Group practice

Dr. med. Peter Kutzim

Dr. med. Michael Marquardt

Dr. med. Jörg Olschinka

Keeping you healthy is more than our profession. It is our ambition

For many years, the group practice OCS® Düsseldorf has been helping patients from near or far to restore or keep their health.

All the way, we attach great importance to establishing a personal relationship to every single "customer" and giving him or her the best and most individual advice and treatment possible.

Our offer includes differentiated therapy, surgical and non-surgical measures (see right), based on fast, efficient and up-to-date diagnostics (e.g. MRI, CT scan, ultrasound, digital x-ray) in cooperation with our medical partners.

This flyer provides information about the main medical services available – but can only act as a rough guide, as the range is much larger.

Therefore, if you have any questions, don't hesitate to contact our team – we will be glad to help.

By Oliver Peter Kühn Michael Mayrhardt
